ROOT PEELER

RP800

ROOT PEELER RP800

The Vegetable & Root Washer/Polisher is designed for effective cleaning and optional peeling of root vegetables like potatoes, carrots, and ginger. With durable soft or hard brushes, it can polish or peel raw produce efficiently. The machine features a sleek, rust-resistant stainless-steel design, high cleaning volume, low energy consumption, and user-friendly, continuous operation. Its long-lasting nylon cord brush rollers ensure durability and wear resistance.

IT CAN PROCESS
300 TO 500 KG/H

KEY BENEFITS

Efficient Peeling: Equipped with high-speed rotating brushes and impact mechanisms, it ensures rapid and effective skin removal.

Adaptability: It easily adapts to different vegetable sizes and varieties, with simple adjustments.

User-Friendly Operation: Featuring automated controls, the machine is straightforward to operate, understand, and manage.

Labor-Saving: The use of this peeler drastically reduces the need for manual labor, boosting overall production efficiency.

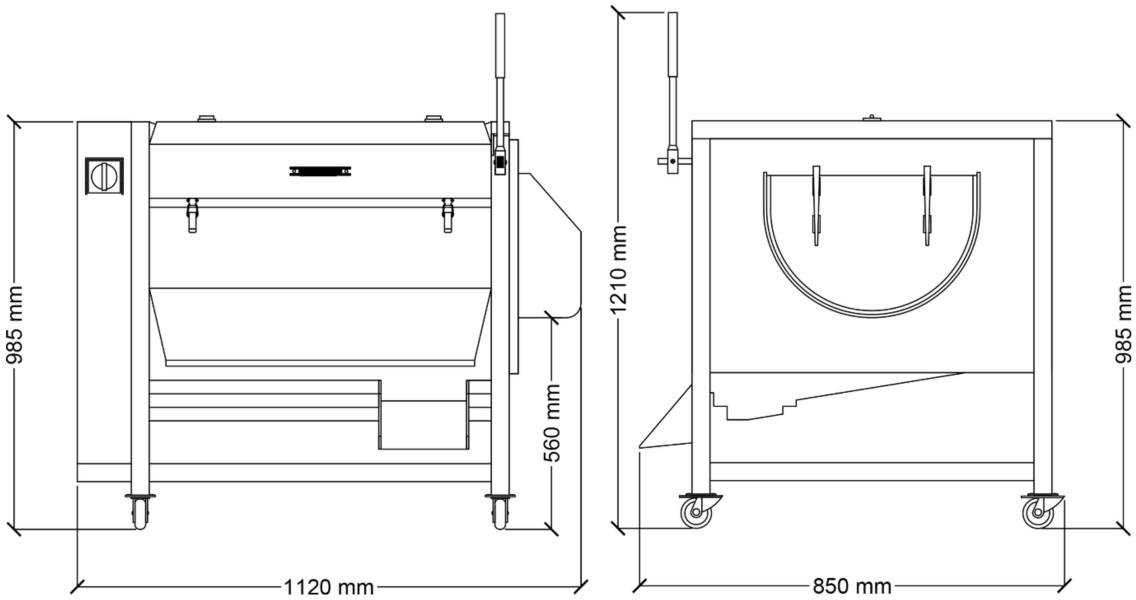

Hygienic and Eco-Friendly: Constructed from food-grade 304 stainless steel, the machine meets food hygiene standards, is easy to clean, and environmentally friendly.

TECHNICAL SPECIFICATION

Productivity	300-500 kg/h
Brush length	6 brushes 790 mm long
Material	Stainless steel
Electric power	1.1 kW
Electric connection	400V/220V
Discharge Height	560 mm
Dimensions	1120 × 850 × 1210 mm
Weight	110 kg

The electrical connection standard is 400 V / 50 Hz / 3 phases. While we also offer 2-phase, 3-phase, as well as a 110 V connection.
